

**Microcement and resin system for the creation of seamless vertical and horizontal surfaces. CE-marked according to UNI EN 13813 *Screed material and floor screeds*, HACCP-certified for use in food processing environments, with a dynamic friction coefficient conforming to the provisions of the Italian M.D. 236 and R-9 value for slip resistance.**

**Wait at least 24 h from the application of the last coat before walking on the surface. Avoid any abrasive action, avoid deposit of dirt, wet, oily or staining substances. Wait at least 7 days for the topcoat to fully cure and guarantee its maximum resistance to friction, abrasion, dirt pick-up. Wait at least 7 days before cleaning the surface. Any aggressive substance, such as wet, dirt, oily, staining substances, should be removed from the surface in 2 hours from deposit if the surface was treated with CREATIVO® TOP in 2 coats, 4-6 hours if the surface was treated with CREATIVO® TOP in 3 coats, as by prolonged contact the staining substance might be absorbed by the microporosity of the film and deteriorate its appearance irrevocably.**

## FLOOR CLEANING PROTOCOL

During multiple lab tests to achieve the HACCP certification, CREATIVO® MICROCEMENT has shown an excellent resistance to both alkaline and acid detergents. In any case ordinary cleaning of surfaces must be performed with neutral detergents according to the procedures described below. Do not clean with vapour.

The following cleaning protocol is valid for all surface treated with CREATIVO® MICROCEMENT full system. The selected products are detergents certified eco-friendly products with reduced presence of polluting substances. The concentration of the product has been verified to avoid chemical aggression and deterioration of the finish.

### ORDINARY CLEANING

Cleaning has to be performed within 2 hours from the staining with wet dirt of the surface treated with CREATIVO TOP in 2 coats, or whitin 4-6 hours from the staining with wet dirt of the surface treated with CREATIVO TOP in 3 coats, as per following procedure.

Dose **LIME** (TDS attached) or equivalent product, in the dedicated bucked or tank.

CONCENTRATION: 1% (10 ml of product in 1 l of water).

Spread the solution on the floor manually by mop or cleaning pads, or mechanically with a fully functioning floor cleaning machine. It is not necessary to rinse it after. The treated surface must be left perfectly dry, without residual deposits of water or liquids in general.

### EXTRAORDINARY CLEANING

For a **deep cleansing with degreasing effect**, use **EUR** (TDS attached), or equivalent products. CONCENTRATION: 5% (50 ml of product in 1 l of water). Spread the solution on the floor manually by mop or cleaning pads, or mechanically with a fully functioning floor cleaning machine. Carefully rinse the surface. The treated surface must be left perfectly dry, without residual deposits of water or liquids in general.

For a **radical cleaning** of the floor, use the product **CHERODAL** (TDS attached), or equivalent products. CONCENTRATION: 5% (50 ml of product 1 l of water).

Spread the solution on the floor manually by mop or cleaning pads, or mechanically with a fully functioning floor cleaning machine. Carefully rinse the surface. The treated surface must be left perfectly dry, without residual deposits of water or liquids in general. Rinse the floor thoroughly. The treated surface must be left perfectly dry, without any residual deposit of water or liquid in general.
